QUARTZ WATCHES

We offer two types of quartz watch, at the heart of both a small crystal vibrates at a steady frequency and is responsible for high precision.

ANALOGUE watches possess continuous Analogous drive, the hands being driven by a small motor governed by the vibrations of the crystal.

LCD watches have a continuous Liquid Crystal Display, showing the time in figures. Varying features on individual watches allow additional information to be given at the touch of a button.

Full instructions with each watch.

For an easy guide to the main features of our LCD watches look at the symbols beside each watch and refer back to the key opposite.
